Synergistically embrace 2.0 paradigms through professional intellectual capital. Interactively strategize parallel growth strategies without out-of-the-box web services.

What Will You Learn?

I take my courses very seriously but at the same time I try to make it fun since I know how difficult learning from an instructor with a monotone voice or boring attitude is. This course is fun, and when you need some energy to keep going, you will get it from me. Practice, practice and more practice. Every section inside this course has a practice lecture at the end, reinforcing everything with went over in the lectures. I also created a small application the you will be able to download to help you practice PHP. To top it off, we will build and awesome CMS like WordPress, Joomla or Drupal.
